

# MOHAMMED MERAJ

## BACKEND DEVELOPER

### PROFILE

Dedicated and detail-oriented Backend Developer with a strong foundation in server-side logic, API development, and database management. Skilled in technologies such as Node.js, Express.js, MongoDB, and Python, with a passion for creating efficient and scalable web applications. Experienced in optimizing backend processes, improving system performance, and ensuring security in application architecture. Currently pursuing a (BCOM) and working on various projects that showcase my technical expertise. Eager to contribute my skills to a dynamic team and continue learning cutting-edge technologies.

### WORK EXPERIENCE

#### Tekisky Pvt Ltd

Backend Developer (Api Developer)

Developed and maintained scalable backend systems for the Tekisky Mart platform, ensuring smooth integration with frontend applications.

Designed and implemented RESTful APIs, improving data flow and communication between services.

Optimized database queries and improved system performance, reducing API response time by 30%.

Worked closely with the frontend team to deliver seamless user experiences by providing well-documented API endpoints.

Integrated third-party services and payment gateways, enhancing the platform's functionality and user experience.

Monitored and troubleshooted backend issues, reducing downtime and ensuring reliable system performance.

Participated in code reviews and collaborated in Agile sprints to meet project deadlines effectively.
